

## At the International School of Turin, our students continue to achieve their full potential in the IB Diploma Programme.

**Our students continue to earn an average score above the global average.**

However, we also recognize scores are only one way of measuring the success of the IB Diploma Programme. All students are included in our results statistics and our school mission always takes priority. Decisions regarding subject groups and levels are made in order to provide students with the most challenging and intellectually stimulating combination of courses for each individual student.

We also believe that university destinations for IST graduates reflect our focus on holistic education and we celebrate each student's personal and academic success.

The IB Diploma is a high school qualification that is recognized by universities around the world. All students who choose to pursue the diploma must take the standardized IB examinations, administered by the IB. IST is a non-selective IB school, which means that all students are eligible to challenge themselves by attempting the IB Diploma Programme.

### Summary of IST Results: 2015-2019
